

# Spring 2019 Undergraduate Seminar

Department of Mathematics

## What is the UMS?

### UMS Organizers

Mathematics Department, University of Pittsburgh

**Date:** Tuesday, January 15

**Time:** 12:00-12:50 pm

**Location:** Room 703, Thackeray Hall

The Undergraduate Math Seminar (UMS) is a weekly seminar hosted by the Math Department. Speakers will give a talk about something interesting in their research or something interesting to undergraduates. There will also be talks from outside guests about math careers or steps towards pursuing a future in mathematics. Stop by and learn some math!

Math gets a bad rap. It's too hard, it's not useful, it's not fun... We hope to change your mind! This introductory talk will discuss the goal(s) of the Undergraduate Math Seminar. We will introduce ourselves (the organizers) and talk about the type of research we all do and how we became interested in it. Further, we will tell you of our experiences with research and how you can become involved in the math community. We hope you join us and tell us a bit about yourself as well! Pizza and drinks will be provided!

### SPEAKER(S) FOR NEXT WEEK:

Derek Orr

Organized by: Tom Everest, Derek Orr, Jeff Wheeler, and Jeremiah Morgan
