## Tentative Schedule and Homework Assignments for MATH 1550

## Fall 2011

The schedule below is tentative and will be updated as the course progresses. Homework is due on Fridays at the end of class.

| Date | Sections | Topics | Homework due |
| :---: | :---: | :---: | :---: |
| Mon., Aug. $29$ | 1.1-1.3 | Review of basic vector algebra; basis vectors |  |
| Wed., Aug. 31 | 1.3-1.5 | Change of basis; vector products |  |
| Fri., Sept. 2 | 1.5, 1.6 | Vector products (cont'd); reciprocal bases |  |
| Mon., Sept. 5 |  | Labor Day (no class) |  |
| Wed., Sept. 7 | 1.6 | Reciprocal bases (cont'd), Einstein summation convention, covariant and contravariant components |  |
| Fri., Sept. 9 | 1.6, 1.7 | Covariant and contravariant components (cont'd) | Problem 3, p. 40 <br> Work out cases 2,3,4 in Problem 9, p. 44 <br> pp. 54-55, \#2,6,9,10,11 <br> p. 57, \#22 (a, c) <br> Solution |
| Mon., Sept. $12$ | 1.7, 2.1-2.3 | Vector functions; introduction to tensors; zeroth and first order tensors |  |
| Wed., Sept. $14$ | 2.3, 2.4 | First and second order tensors |  |
| Fri., Sept. $16$ | 2.4-2.6 | Second order tensors (cont'd) | Click here for homework \#2 Solution |
| Mon., Sept. $19$ | 2.6, 2.7 | Second order tensors (cont'd), higher order tensors Read these notes on transformation of tensors under rotations and invariance of tensor equations |  |
| Wed., Sept. 21 | 2.8 | Curvilinear coordinates |  |
| Fri., Sept. $\text { \| } 23$ | 2.8, 2.9 | Curvilinear coordinates (cont'd), tensors in generalized coordinate systems | Click here for homework \#3 <br> Solution |
| Mon., Sept. $26$ | notes, 2.9 | Tensors in generalized coordinate systems (cont'd) |  |
| Wed., Sept. $28$ | notes, 2.9 | Tensors in generalized coordinate systems (cont'd) |  |
| Fri., Sept. 30 |  | Review <br> Old Exam 1 (ignore problems $4 \& 5$, which are on the material from 2.9, not covered in this year's Exam 1) Solution <br> Additional practice problems for Exam 1 <br> Solution | Click here for homework \#4 Solution |
| Mon., Oct. $3$ |  | Exam 1 (1.1-2.8) <br> Solution |  |
| Wed., Oct. 5 | notes, 3.1 | Tensors in generalized coordinate systems (cont'd); tensor addition and multiplication by a scalar |  |
| Fri., Oct. 7 | 3.2-3.4.1 | Inner and outer products of tensors; symmetry properties of tensors | Click here for homework \#5 Solution |
| $\begin{aligned} & \text { Mon., Oct. } \\ & 10 \end{aligned}$ |  | No class (Fall Break) |  |

| $\begin{aligned} & \text { Tues., Oct. } \\ & 11 \end{aligned}$ | $\begin{aligned} & \text { 3.4.1, 3.7, } \\ & \text { notes } \end{aligned}$ | Meet at noon (follow Monday schedule) Symmetry properties (cont'd); pseudotensors |  |
| :---: | :---: | :---: | :---: |
| Wed., Oct. $12$ | 3.7, 3.4.2, <br> notes | Pseudotensors (cont'd) |  |
| Fri., Oct. <br> 14 | 3.5 | Reduction of symmetric tensors to principal axes | Click here for homework \#6 (you may want to read these notes first) Solution |
| $\begin{aligned} & \text { Mon., Oct. } \\ & 17 \end{aligned}$ | 3.6 | Invariants of a tensor; surface integrals |  |
| Wed, Oct. 19 | 4.2, 4.4 | Surface integrals (cont'd), flux and divergence |  |
| $\begin{aligned} & \text { Fri., Oct. } \\ & 21 \end{aligned}$ | 4.2, 4.4 | Divergence (cont'd), Gauss theorem | Click here for homework \#7 <br> Solution |
| $\begin{aligned} & \text { Mon., Oct. } \\ & 24 \end{aligned}$ | 4.1, 4.4 | Line integrals, circulation and curl |  |
| Wed, Oct. 26 | 4.2, 4.4 | Curl (cont'd), Stokes theorem <br> This week's office hours are rescheduled to Friday, Oct. 28 |  |
| Fri., Oct. 28 | 4.2, 4.3 | Green's theorem, directional derivative Office hours 2-3 pm and 4-6 pm |  |
| Mon., Oct. $31$ | 4.3 | Properties and coordinate-free definition of gradient | Click here for homework \#8 (note Monday deadline due to rescheduled office hours) Solution |
| Wed., Nov. 2 | 4.5, 4.6 | Properties of differential operators; second-order tensor fields |  |
| Fri., Nov. 4 |  | Review <br> Practice problems for Exam 2 (includes problem from old exams) Solution | Click here for homework \#9 Solution |
| Mon., Nov. 7 |  | Exam 2 (2.9-4.4) <br> Solution |  |
| Wed., Nov. 9 | 5.1 | Covariant differentiation of vectors, Christoffel symbols |  |
| $\begin{aligned} & \text { Fri., Nov. } \\ & 11 \end{aligned}$ | 5.1 | Covariant differentiation of vectors, Christoffel symbols (cont'd) | No homework due this week |
| Mon., Nov. 14 | 5.1 | Calculation of Christoffel symbols, covariant differentiation of tensors |  |
| Wed., Nov. 16 | 5.1 | Rules of covariant differentiation, Ricci's theorem; differential operators in generalized coordinates |  |
| Fri., Nov. <br> 18 | 5.1, 4.6.1 | Differential operators in in generalized coordinates; the case of orthogonal curvilinear coordinates | Click here for homework \#10 Solution |
| Mon., Nov. $21$ | 5.1, 5.2 | The case of orthogonal curvilinear coordinates (cont'd); integral theorems |  |
| Nov. 23-27 |  | No classes (Thanksgiving Break) |  |
| Mon., Nov. 28 | 5.2, 5.4 | Integral theorems (cont'd); potential and irrotational fields |  |
| Wed., Nov. 30 | 5.4 | Potential and irrotational fields (cont'd) |  |
| Fri., Dec. 2 | 5.4, 5.5, 5.8 | Potential and irrotational fields (cont'd); solenoidal fields; application to electromagnetism | Click here for homework \#11 Solution |
| Mon., Dec. 5 | 5.7 | The fundamental theorem of vector analysis Review <br> Practice problems for Exam 3 solution Old Exam 3 solution |  |

| Wed., Dec. <br> 7 | Review |  |  |
| :--- | :--- | :--- | :--- |
| Fri., Dec 9 |  | Exam 3 (4.5-5.2, 5.4, 5.5) |  |
