Part of the 2021 Dietrich School "Science Revealed" Public Lecture Series

Thursday, April 15
7 - 8 p.m.

Free and open to the public.

Register by April 12.

"Safety in Numbers? The Use (and Misuse) of Data in Society"

Data is everywhere: from COVID efficacy rates to election polling, from the justice system to the internet.

Data can be a tool to improve our lives, but what about the downside to all of this use of data – not only through hacks and security breaches, but also when data is manipulated to advance certain political and social agendas?

Join Dietrich School faculty members Thomas Hales, Lucas Mentch, Sandra Mitchell, Lara Putnam, and moderator Lisa Parker, for a lively conversation about the role that data plays in society – the good, the bad, and the life altering.
