

Fall 2018 Undergraduate Seminar

Department of Mathematics

The “Real World” for STEM majors: A Survival Guide

Sarah Klos

Operations Supervisor, PNC Bank

Date: Tuesday, October 23

Time: 12:00-12:50 pm

Location: Room 703, Thackeray Hall

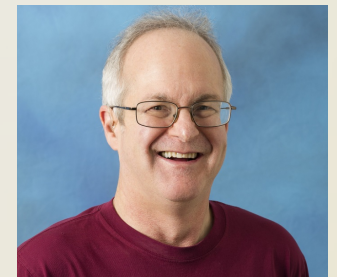

Sarah Klos works at PNC Bank as an Operations Supervisor in the Cash Logistics Department, where they monitor large cash transactions between vendor vaults, branches, and high-profile clients. While there, she has also gained experience in Project Management and Business Analytics. Sarah graduated summa cum laude from Carlow University in 2016 with a B.S. degree in Mathematics and a minor in Business Management.

“What can you *even do* with a degree in math?” is a derisive question many math majors run into during their college career when in fact, math majors can apply their education to many platforms in society. I will discuss my background in mathematics, current responsibilities at PNC, résumé building while in college, tips on how to prepare for job searching, and how much problem-solving skills are needed in the real world. Pizza and drinks will be provided!

SPEAKER FOR NEXT WEEK:

Dr. Ermentrout

Organized by: Tom Everest, Derek Orr, Jeff Wheeler, and Jeremiah Morgan
